

## Trevor W. Haggerty

Graphic Artist, Computer Programmer, Technologist

Trevor currently serves as Lead Artist at Line and Grade. He is involved in all aspects of conceptual design as well as assisting in various design and production related tasks.

Trevor offers a unique blend of creative bent balanced with the inherent technical knowledge of the design process. His experience aides in the vision of a variety of civic infrastructure improvement projects through the eye of the artist, offering a creative approach to the civil engineering world.

Trevor's primary responsibilities include the production of plan, isometric, and sectional non-photo-realistic and photo-realistic renderings, three-dimensional modeling of existing and proposed infrastructure and production support as needed in the development of construction documents.

**Years with Line and Grade 4.5**
